

Toyota Forklift Part

Toyota Forklift Part - Since 1992, Toyota Material Handling inc., U.S.A., also referred to as TMHU, continues to be the top selling lift truck provider in the U.S. This business has been situated out of Irvine, California for well over 40 years, offering a comprehensive line of quality lift trucks. With an impressive reputation of durability and reliability, Toyota lift trucks have thrived in the competitive resources handling market. Quality is the cornerstone of Toyota's notorious Toyota Production System practiced at all manufacturing facilities, including TIEM, which is stands for Toyota Industrial Equipment Manufacturing, situated in Columbus, Indiana. The majority of the Toyota lift trucks sold in the U.S.A are manufactured here.

Every one of Toyota's manufacturing plants within Canada and the United States comply with the International Organization for Standardization or ISO 14001 standard. The Columbus TIEM plant has been honored on many occasions for its commitment to continual improvement and its environmentally friendly systems. It is the first and only producer to offer EPA and CARB-certified Compressed Natural Gas powered lift trucks on the market. For example, the Toyota 8-Series IC lift trucks emit 70 percent less smog forming emissions than the existing federal EPA standards and have complied with California's strict emission standards and policies.

Toyota Material Handling, U.S.A. - The Industry Leader

Brett Wood, President of TMHU, links Toyota's success to its stout commitment to constructing the best quality lift trucks at the same time as delivering the utmost customer service and support. "We must be able to learn and predict the needs of our customers," said Brett Wood. "As a leader, our success also depends on our ability to address our customers' operational, safety and environmental cost issues." TMHU's parent company, Toyota Industries Corporation, often known as TICO, is listed in Fortune Magazine as the world's largest lift truck supplier and is amongst the magazines prestigious World's Most Admired Companies.

New Meaning to Environmental Responsibility

Toyota's parent company, Toyota Industries Corporation, has imparted an excellent company principles towards environmental management within Toyota. Toyota's rich history of environmental protection whilst retaining economic viability can not be matched by other companies and undoubtedly no other resource handling producer can yet rival Toyota. Environmental responsibility is an important characteristic of company decision making at Toyota and they are proud to be the first and only maker to offer UL-listed, EPA - and CARB -certified Compressed Natural Gas powered lift trucks. Yet an added reason they remain a leader within the industry.

Toyota originally introduced the 8-Series line of lift trucks in 2006, yet again exhibiting its leadership and innovation in the industry. Featuring an exclusive emission system that eclipsed both Federal EPA emission values, and California's more environmentally friendly emission standards. The finished invention is a lift vehicle that creates 70% less smog forming emissions than the present Federal standards tolerate.

Moreover in 2006, Toyota established an affiliation with the Arbor Day Foundation, furthering their dedication to the environment. In excess of 57,000 trees have been planted in local parks and national forests damaged by natural causes such as fires, as a result of this relationship. 10,500 seedlings have also been circulated through Toyota Industrial Equipment's system of dealers to non-profit organizations and local customers to help sustain communities all over the United States

Toyota's lift trucks provide enhanced efficiency, visibility, ergonomics and durability, and most notably, the industry's leading safety technology. The company's System of Active Stability, also referred to as "SAS", helps reduce the chance of accidents and accidental injuries, in addition to increasing productivity levels while minimizing the likelihood of product and equipment breakage.

System Active Stability can discern conditions that may lead to lateral unsteadiness and possible lateral overturn. When any of these factors have been detected, the SAS will instantly engage the Swing Lock Cylinder to re-stabilize the rear axle. This adjusts the lift truck's stability trajectory from triangular in shape to rectangular, offering a major increase in stability which substantially reduces the probability of an accident from a lateral overturn. The Active Mast Function Controller or the Active Control Rear Stabilizer also helps to avoid injuries or accidents while adding strength.

SAS was originally introduced to the market on the 7-Series internal combustion models in 1999 and subsequently catapulted Toyota into the industry leader for safety. Ever since then, SAS continues to be integrated into nearly all of Toyota's internal combustion products. It is standard gear on the new 8-Series. There are more than 100,000 SAS-equipped lift trucks in action, exceeding 450 million hours combined. The increased population of SAS-equipped vehicles in the field, along with mandatory worker training, overturn fatalities across all brands have decreased by 13.6% since 1999. Furthermore, there has been an overall 35.5% decrease in industry wide collisions, loss of control, falls and overturn from a lift truck for the same period.

Toyota's standard of excellence reaches far beyond its technological achievements. The company maintains a widespread Operator Safety Training course to help customers meet OSHA standard 1910.178. Instruction services, video lessons and assorted materials, covering a broad scope of matters-from personal safety, to OSHA rules, to surface and load situations, are accessible through the vendor network.

Since the transaction of its first lift vehicle in the U.S. to the fabrication of its 350,000th lift vehicle produced in 2009 at Toyota Industrial Equipment Manufacturing, TMHU has sustained a solid existence in the U.S. This reality is demonstrated by the statistic that 99% of Toyota lift trucks bought in America at the moment are built in the United States.

Based in Columbus, Ind., the Toyota Industrial Equipment Mfg. campus equals 998,000 square feet of facilities spanning 126 acres.

Facilities include a National Customer Center, as well as production operations and supply centers for equipment and service components, with the whole investment exceeding \$113 million dollars.

The new National Customer Center was conceived to serve both sellers and clients of TMHU. The facility includes a 360-degree showroom, a presentation theater complete with stadium seating for 32, an section for live product demonstrations with seating capability for 120; a presentation theater; Toyota's Hall of Fame showcasing Toyota's history since the birth of its originator, Sakichi Toyoda, in 1867, and finally a instruction center.

TMHU has 68 official industrial equipment dealers, along with 189 dealership locations throughout the United States, providing the most comprehensive and inclusive consumer support and customer service in the industry. The company's new and Licensed Used lift trucks, service, parts, and financing capabilities make Toyota dealerships a one-stop shop to ensure overall customer satisfaction.
