

Meritor Parts

Meritor Part - The Meritor Business is a premier global supplier established upon 100 years of tradition of service and quality. Meritor concentrates on integrated systems together with different modules and parts to the original machine makers and aftermarket equipment within the transportation and industrial trades.

Meritor values the wishes of their clients to guarantee their success while priding itself in the company's unique energy and believes this output of energy to be their competitive advantage in their global operations. Meritor begins with a philosophy that values diversity of individuals and their broad thought processes. Operating in 19 nations and hiring over eleven thousand two hundred individuals, Meritor promotes collaboration and innovation among a team of knowledgeable experts.

Meritor strongly believes in just employing future focused workers. These top-caliber individuals could quickly adapt to changing environments and freely demonstrate the level of performance and commitment necessary so as to attain results for the competitive market environment. The company empowers their teams to make sound business decisions so as to enhance the overall success of the business. In return, Meritor provides all their workers different chances for professional and personal development.

Their Advanced Engineering team is at the forefront of parts and system engineering which consist of drivelines, axles, braking and suspension systems utilized for medium and heavy duty trucks, military vehicles, trailers, off-highway vehicles and buses. The Meritor Advanced Engineering team is developing. They started a new technical center in Bangalore, India in September 2009 in order to lead their advanced product development initiatives which represent the whole Asia Pacific region. This team is also responsible for supporting the needs of all their global engineering employees.

The Quality team at Meritor is a dynamic and customer-focused group who is committed to ensuring optimum development at their production plants and aftermarket distribution facilities that are situated on 5 continents and in 19 nations.

The supplier development network is specially situated so as to support new business growth. Regional teams are supported by international quality systems, centralized specialties and initiatives in Materials Engineering and Six Sigma. Meritor's growing Six Sigma program encourages a fact-based, data-driven method to decision making within each and every aspect of the company. The DFSS or Design for Six Sigma ensures product reliability in each region. The team is likewise comprised of transactional Green Belts who make use of Six Sigma tools to business processes and apply lean methods.
